

# LUCKY TRIPLE ROULETTE SIDEBET

The game Lucky Triple combines the winning number from the roulette with the result of three dice.

The dice machine is activated when the "No more bets" phase is reached in roulette and is stopped either after a minimum dice duration or when the roulette ball falls.

The Lucky Triple side bet is based on comparing the fallen roulette number with the result of the three dice.

The assignment of dice fields is according to roulette numbers: Dice Field 1 for numbers 1-6, Dice Field 2 for numbers 7-12, and so on.

For example, if the roulette number is 3, Dice Field 1 wins if at least one "one" appears in the dice roll. If the roulette number is 9, Dice Field 2 wins if at least one "two" is drawn in the dice roll.

Bets need to be placed only on the desired side bet field.

Winnings are paid out as follows:

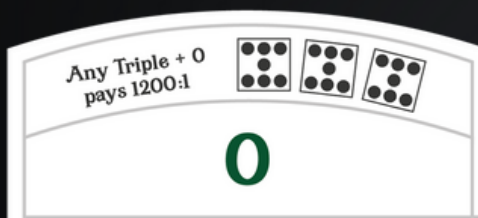

- Dice Triple with the matching number: 500:1
- Dice Double with the matching number: 27:1
- Dice Single with the matching number: 4:1

CamShaker

1	2	3	+ 1-6 • Single/Double/Triple pays 4, 27, 500:1
4	5	6	

In addition to the standard winnings, there is a field that pays out with "Any Triple" in combination with the roulette Zero, at a ratio of 1200:1.

If the table is equipped with a wireless stop button, players have the option to stop the dice roll in turn by pressing the button when it flashes red.

Any Triple + 0 pays 1200:1			0		
1	2	3	+ 1-6 • Single/Double/Triple pays 4, 27, 500:1	1st 12	1-18
4	5	6			
7	8	9	+ 7-12 • Single/Double/Triple pays 4, 27, 500:1
